SUMMARY

Second-year Computer Science student and open-source contributor with over 60 merged pull requests to major projects including GRASS GIS, FOSSology, and QGIS. Builds full-stack and AI/ML applications, and was admitted to the Apple Developer Academy (Federico II with Apple) on a full EU-funded scholarship.

OPEN-SOURCE CONTRIBUTIONS

GRASS GIS, OSGeo | *Python, pytest* 22 merged PRs, 2026

- Migrated legacy unittest test suites to pytest across raster and temporal modules (r.null, r.cross) and added regression tests for other tools (t.list, r.plane, r.boxplot).
- Fixed bugs in several GRASS tools, including r.fillnulls, r.semantic.label, and r.sim.water, and wrote tutorials for the project.

FOSSology (fossology-python), Linux Foundation | *Python, REST* 10+ merged PRs, 2026

- Extended the official Python API client with wrappers for new endpoints, including uploads (agents, clearing-progress, license histogram), license import and export as CSV, and report import.
- Added unit tests for error cases (users, uploads, groups) and fixed several API error-handling and data-parsing bugs.

QGIS.org Website, QGIS | *Python* Merged, 2026

- Fixed two bugs in the website's commercial-contributors script: a division-by-zero error on empty data, and valid support URLs being removed when a link check failed temporarily.

PROJECTS

Samay Sarathi | *Flutter, Spring Boot, WebSocket, PostgreSQL, Redis* (Live) 2025 – Present

- Co-founded a real-time platform that connects ambulances, hospitals, and traffic police. Built multi-role mobile apps with live location tracking and a recommendation engine that ranks hospitals by bed availability, specialist match, distance, and traffic. Presented at India Innovates 2026.

DocBlock | *Next.js, LangChain, Qdrant, Groq* (Live) (Code) 2026

- Built a retrieval-augmented (RAG) web app to chat with PDF documents, giving page-level citations for every answer. Used per-document Qdrant collections, chunking, and a strict prompt to keep answers grounded in the source.

Agent CLI | *Node.js, OpenAI SDK* (Code) 2026

- Built a command-line AI agent with a step-by-step reasoning loop that clones a live website into working HTML, CSS, and JavaScript. Supports multiple LLM providers.

EXPERIENCE

Teaching Assistant (Buddy Program), Scaler School of Technology Mar 2026 – Present

- Support junior students in Web Development and Linear Algebra, running weekly one-on-one mentoring sessions and answering questions within 24 to 48 hours.

Project Admin and Contributor, GirlScript Summer of Code Jul – Oct 2025

- Started as a contributor (React.js and Express.js) and was promoted to Project Admin. Managed pull requests, mentored contributors, and handled issue triage and release planning.

Open-Source Contributor, Social Summer of Code (SSOC'25) Jun – Aug 2025

- Finished 60th nationally with 260 points and 7 merged pull requests. Worked on responsive UI redesigns and a live password-strength meter, contributing to the Ruby for Good (CASA) project.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Dart, SQL

Machine Learning and AI: PyTorch, RAG, LangChain, Qdrant, FAISS, BM25, sentence-transformers, Groq, Gemini, Hugging Face

Testing and Open Source: pytest, unittest, Git, CI/CD, REST APIs, code review

Web and Mobile: React, Next.js, Node.js, Express, Spring Boot, FastAPI, Flutter, Tailwind CSS

Databases and Cloud: PostgreSQL, PostGIS, MySQL, Redis, Firebase, Docker, GCP Cloud Run, Vercel

HONORS AND AWARDS

- Admitted to the Apple Developer Academy (University Federico II with Apple, Naples), 2026–27. Selected through an assessment test and interview, and awarded a full EU-funded scholarship (Regione Campania).
- Top 100 (national) at the Meta Hackathon, 2025.
- Top 7.5% in Classical Machine Learning in the SST cohort; A* (top grade) in Machine Learning I and II.
- Rank 60 at Social Summer of Code 2025 (260 points, 7 merged pull requests).
- GitHub achievements: Pull Shark (x2), Pair Extraordinaire, and Quickdraw.

EDUCATION

B.Sc (Hons) Computer Science, Scaler School of Technology (SST) 2024 – 2028

Second year. CGPA 8.2 (SST), 8.7 (BITS Pilani).
